Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

This office action is in response to the instant claims, received 9/21/01.

Claims 1-6 are pending.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 2-6 recite "...characterized that...". This is vague and indefinite as to the metes and bounds of the claimed invention, as "characterized" leaves the claims open for the inclusion of unspecified ingredients even in major amounts. See MPEP 2111.03.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1654

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-3, 5, and 6 are rejected under 35 U.S.C. 102(a) as being anticipated by Malina, Biochem. & Biophys. Research Comm., 1999, vol. 265, no. 2, pp-600-605.

The instant invention is drawn to a compound being the reaction between xanthurenic acid and a protein, in which the protein and xanthurenic acid are covalently linked, is made by an incubation of cells cultured in a presence of xanthurenic acid.

Malina discloses a formation of unfolded protein in the presence of xanthurenic acid may take place due to covalent binding of xanthurenic acid to protein. Malina discloses pig and bovine lens epithelial cell cultures incubated in the presence of xanthurenic acid. Malina discloses cell shrinkage and detachment were observed in the presence of xanthurenic acid, leading to cell death. See, i.e., for example, abstract, materials and methods section, and page 604, 1st paragraph.

Therefore, the reference is deemed to anticipate the instant claims.

Conclusion

All claims are rejected.
